General Comment

While I can appreciate the United States always progressing towards technological advancements, I believe AI is the opposite of such. AI relies on theft and plagiarism, which is a direct threat to jobs in the marketplace, including digital art, animation, film, photography, music, and voice over, to name a few. In addition, AI has become a weapon used to falsify information and create fake evidence, in an attempt to sabotage the reputation and image of individuals, such as Taylor Swift, Elon Musk, and President Trump, to name a few. AI and its use in making healthcare decisions for Americans led to the assassination of a CEO. AI uses the images of doctors, government leaders, and influencers to broadcast misinformation to affect the public view on certain issues and topics. AI has absolutely NO PLACE in the modern world, nor will it in the future. So long as it continues to be pushed, it will continue to hurt and make obsolete.
