## General Comment

Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

I am an artist, educator, and parent, and I am deeply concerned by this proposal.

This administration's AI Action Plan proposes the unlawful seizure of personal and licensed content, and to then hand that content to for-profit enterprise. When wealthy and powerful companies can steal and profit from what we create, there is no path for recourse for creators. If creativity is devalued, creative jobs cease to exist.

There should be an opt-in model to submit personally owned content to LLMs, so that we can decide when and where our work is used by AI systems.

The AI Action Plan should also require transparency from the companies that own and operate LLMs, requiring them to disclose what material is in their training datasets, and label what content is AI generated.

Thank you for your consideration.
