General Comment

AI companies have been using their technology to steal the work of artists and writers to train their models and then replace them with images no one wants and text that has to be thoroughly checked by a human anyway. The creation of these generative AI models takes incredible amounts of resources, from electricity to fresh water. Reports have shown that they even rely on underpaid workers in other countries, where horrible working conditions make their days miserable. We need stronger regulations on AI and on these companies, not weaker regulations.
