General Comment

"AI" is a speculative market in the vein of cryptocurrency and NFTs, with huge legal problems; OpenAI and other companies are currently embroiled in lawsuits from newspapers and publishers. "AI" runs on wholesale copyright infringement, and even OpenAI's CEO admits that without copyright infringement, his product is dead in the water. Setting ALL of this aside, "AI" is environmentally disastrous and built on underpaid, "invisible" labor, in addition to simply not working. It doesn't even work! It's fleecing the American public and has no place in federal policy or development.
