General Comment

It is inexcusable for private companies to skirt around copyright law in their efforts to train their "AI" systems. Any private or corporate entity who wants to use copyrighted works, must compensate the owners of that copyright. Copyright is the bedrock of intellectual property law in the US, allowing us to dominate in the entertainment sector. If we want to continue to create high quality media, we cannot penalize creators and producers, allowing the theft of their work in favor of an often competing business model.
