General Comment

Please do not allow any AI, LLM, or related services to glean any amount of information, training, or utility broadly from copyrighted material of any kind. Art, literature, music, film, and games should be valued on their own merits, not simply by what they can feed algorithms and models.

This has the potential to alter the entire United States' relationship to copyright, and I do not feel that it should; or rather, if it does, we should alter what exists in the public domain for all uses rather than carving out one niche use exception for AI/LLM-related services.
