General Comment

Hi my name is William. I have been working in the IT industry for over 4 years and have been involved with tech my entire life. From my first video game, building my first PC, to getting a bachelors degree so I could pursue a career in tech. I, someone who has grown up with technology as it's advanced, revolved my life around it for better or worse. Tech does not have our best interest in mind, only our time and data. Going forward with this action plan is in no one's interest except those who seek to profit from not having to pay people. The effect of allowing this type of plan to continue will be essentially digitally lobotomizing ourselves as a country.
