General Comment

This proposal amounts to theft of copyrighted works. That is theft of intellectual property. As someone who holds a copyright, I vehemently oppose not only the theft of my work but also denying me the ability to redress it in court. That is a violation of my rights as the creator of the work. Moreover, this suggests a devaluing of the work done by authors and other copyright holders, and it is a threat to their livelihoods. Will AI also be able to use trademarks with impunity? Or will trademarks remain protected? What about patents? Frankly, if OpenAI can't be profitable without copyright infringement, then maybe it should find a new business model.
