General Comment

The intellectual properties of writers, musicians, and artists must be protected. Copyright law exists so these artists can benefit from their years of dedicated practice and refining of their skills. Generative LLM AI does not generate truly new material. It regurgitates already existing material into a crude facsimile without meaning. If a person does this then they are liable to be sued for copyright infringement. Why should a LLM AI model not be subjected to that same scrutiny? AI can only be helpful to people if it is heavily regulated.
