General Comment

Dear NSF,

I am an artist and pharmacist. AI, no matter the intentions, cannot replace the critical decision making and creative skills of a human being. Generative AI creates an excessive power cost which hurts the electric bills. Generative AI uses up too much water, which is already a concern. Most importantly, it drives artists to no longer create due to how AI is gathered off of previous works without consent. I am firmly against AI, and instead hope that regulations and oversight increase, not decrease.
