General Comment

OpenAI lacks any legal standing to scrape and steal copyrighted works off the internet without any form of contract with the creators that includes fair compensation for the work. Beyond that, it has been legally upheld that AI-generated products can NOT be copyrighted themselves. Therefore, by allowing OpenAI to steal from the hard working creators AND major corporations like Disney and Nintendo, OpenAI open themselves up to a world of hurt in the form of lawsuits.

Unless OpenAI intends to make their data sets 'Opt-in' and plan to FAIRLY pay creators for adding their works to their datasets, what OpenAI plans to do is illegal under the usage of copyright.
