Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4205

Comment on FR Doc # 2025-02305

Submitter Information

Name: Kyle Thelin

General Comment

Generative AI should be heavily regulated and subject to the same laws that every other industry is. Currently the so-called AI systems in use are incapable of creating anything unique, and steal artists work to generate their bad results. They should be forced to respect copyright and not in any way given the ability to evade legal repercussions for copyright infringement.
