General Comment

I believe this is potentially the quickest way to destroy all of our culture. if AI is allowed to proceed this way, anything original that's been or will be created can just be fed to it, only dumping out at the very best halfbaked nightmares of what once were creative ideas, and the original people who made them won't have a say. AI shouldn't be a substitute for the hard effort humans want to do to make America a better place, as for now, AI can't and shouldn't replace things that come from souley the human spirit. It's just not possible. It might seem possible if you give AI enough data, enough time, and enough resources, but in the end you'll never be able to achieve what humans have been doing, even if you say you can. So how about instead of allowing an exception that could make America a lot messier than it began with in AI, how about we keep these valued restrictions that are in place for a very long time, and a very good reason.
