Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4211

Comment on FR Doc # 2025-02305

Submitter Information

Name: Andy Modica

General Comment

Do not pass this. This sort of thing messes with a lot of people's livelihoods. AI is a sick trend that steals from people that actually put forward effort and work to get better at a skill or a job. Its a trend that will not last.

Simply put it will ruin jobs. It will ruin creative expression. Traditional art, Digital art, music, actors that play parts in movies, voice actors, and many other creative positions will suffer or even be wiped out entirely. These people put countless hours and days into their craft. To have it robbed by someone who can simply 'generate' something remotely equal is something that has no place in the creative industry. Not only that, but it will be able to re-create people's likenesses, voices, and identities. People will notice.

I know a lot of people think AI generation seems pleasing or approachable because a machine does whatever you want and its easy to do. However, it takes away the human soul behind hard-earned skills and work. It will never be accepted as anything it sets out to 'replace'.

Do not forget the skilled hands that wish to test themselves, create wonderful pieces of self-expression, and have spent years getting there.
