General Comment

Allowing AI to remain unchecked brings serious problems to America and its people. This will allow people to steal the hard work of both private individuals and large companies and also cause immense damage to our strength as a country. Over reliance and indulgence of AI will lead to a mentally weaker and lazier generation which is something we as a nation already struggle with. It will also cause irreversible damage to the internet by flooding it with unreliable images and misinformation, essentially destroying this wealth of knowledge that has been incredibly important in providing information and bring people together. Encouraging AI tech will only stall our progress as a society and make our country weaker.
