General Comment

OpenAI is not AI, it's a categorically different technology. It is pure and simple legalized(?) theft of intellectual property that offers the public nothing but worse, more expensive, goods services and healthcare, and an excuse for vulture capitalists to strip mine our economy and throw working Americans on the slag heap. A fig leaf for all manner of wanton malfeasance from UHC illegally denying healthcare to their captive customers, negligent corporate behavior that permanently destroys industry for short term profit, and war crimes targeting civilians in Palestine. Kill it all with fire.
