Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4279

Comment on FR Doc # 2025-02305

Submitter Information

Name: Anna Daviscourt

[REDACTED]

General Comment

This action plan is a terrible idea and should not have been proposed, and absolutely should not pass. There are many far reaching negative consequences for letting A.I. technology developers have free rein to steal any and all intellectual property for whatever purposes they like. This would have devastating effects on creators, the concept of truth, and the physical well being of the planet.

I am an artist and have already seen the wide spread loss of paying work for human creators- lost in favor of their own work being stolen and used by those who clearly don't value the purpose of creation. When there is a way for greed to feed off of people, it will do so.

There have to be protections put in place to give creators guards and methods of response when it inevitably happens. This action plan would only hasten the demise of art, communication, and the soul of humanity.

We have also already seen how generative A.I. can be misused to create blatant and convincing lies. If you can make a video of anyone saying and doing anything you can think of, where does the protection lie? This is pure gasoline to any propaganda fire. People tend to trust their eyes, and you don't often get the chance to set the record straight.

The environmental impact of the continued expansions of A.I. server farms has been written about by countless journalistic outlets. The water and power consumption it takes to run the computing powers behind these tech machines is enough to power other countries completely. When do we say enough? It should have been yesterday if we want to survive. Say it's today.

Say no to the horrifying action plan. Save what is left of art, truth, and our home.

Thank you.
