General Comment

I am strongly opposed to the development of this AI action plan. I do not believe AI in it's current state has any benefit to the future of America and I don't believe sidestepping over the copyrights of small businesses/creators is going to change that.

AI is full of erroneous data and cannot tell the difference between a true fact and a joke. Googles search AI has famously recommended making pizza with glue, eating rocks as a good source of nutrition, and mixing chlorine bleach with white vinegar in laundry which creates toxic gases. AI doesn't know any facts, just what facts look like, so what benefit does AI provide for national security if it doesn't know what it's looking at?!
