General Comment

I see no future where ai such as this has any positive benefit of the greater world.

Destroying any creative field and filling it unoriginal slop and actively halting the development of children who are inevitably fed this slop and teaches them incorrect morals and ruins them as they grow up

This type of technology also serves as a tool for lies and misinformation. Allowing for people to use any public figure to create a clone to push lies and spread communist propaganda to the american people.

If this were to continue, it sets a dangerous precedent on what a company can do just for the sake of profit. Diminishing any americans right to their privacy and their information for the sake of training ai that only helps to benefit companies.

Turning the Internet into an ai training source, and destroying the Americans right to the Internet
