General Comment

Way to drop this on a Saturday. People who know it's universally. Nobody wants AI garbage to replace human-made things. This is absolute overreach. If you want art made, if you want anything, you should pay to get people with the skills they developed to do it.

When your plumbing breaks, starts shooting water all over your floor, who do you call? Someone with the skills. When your boiler breaks, when your AC acts up, ehj your car breaks down? Somebody who knows what they're doing and the reasons behind it.

This same concept applies with music. It applies with art. It applies with mixing audio, making movies.

AI does not have an understanding or any motives behind any scene. It has no soul and it's not worth the energy it takes for creative outlets like it. People build up these skills and learn for a reason. They'll make something red to signify something, whereas AI would not know. It has no thought.

Letting artificial intelligence do any of these things undermines artistic integrity. It undermines creativity. But most important of all, it undermines what being a human is all about.

I'm writing this to say enough is enough. Anyone with integrity knows AI is not the right way to go and it should be treated as an aid to creation, but not as the sculptor. Or artist.
