

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-xe72-geb5
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4364

Comment on FR Doc # 2025-02305

Submitter Information

Name: Leo Condo

Email: [REDACTED]

General Comment

Generative AI does not have a place in the future of the United States. While AI is ultimately going to become important, whether we want it to or not, the current methods of obtaining training data are immoral, if not downright illegal, due to legal precedent set in the past.

Worse, Deepseekr-1 has shown that OpenAI's methods are inefficient and expensive to maintain. The ecological impact of training AI as it currently stands consumes ridiculous amounts of energy and, in many cases, precious freshwater resources to cool these training centers. Many argue that the grid "can't support an all-electric lifestyle," yet are blind to the fact that this includes AI.

As an American, AI steals from my livelihood and profits off of theft. It inhibits the free thought, creativity, and originality that make this nation unique and wonderful. There is nothing about it that is beneficial to national security. Please do not give AI carte blanche to continue to steal and harm the American people.
