General Comment

Re: National Science Foundation's Request for Information on the Development of an Artificial Intelligence (AI) Action Plan

This is theft, plain and simple. All of those copy written works uploaded on the internet or put into the world were not done so with the intention to have them stolen, and profited from by those thieves. Millions of creators did not consent to have their works taken by this AI phenomenon and it's unfair to give them no say in the matter whether their work is to be used or not to train something that didn't exist a few years ago; something that they now fear will steal from them.

These big tech companies are using fear mongering to bend you to their will, with promises that this is somehow necessary when it absolutely is not.

Please do not allow this. It's an absolutely vile infiltration of our rights as Americans, our property, and our creations. It will create the exact opposite of any kind of human flourishing, or feeling any sort of security within our own country. Thank you.
