As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-xfbi-lwz5
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4392

Comment on FR Doc # 2025-02305

Submitter Information

Name: Daniel Kenna

[REDACTED]

General Comment

If AI is allowed to be trained on people's creations without permission or compensation it will destroy the value of the copyright. The purpose of copyright is to protect people's work so that they can profit from it and therefore they are motivated to create such work. If anyone can just go to the AI company and get a similar work made in the creator's style, how and why would that creator continue creating? They would be forced to go work in another industry.

This would be bad for the AI companies as well. They depend on people creating in order to train their models. If people have no incentive to create, they have nothing to train their models on.

Copyright should be enforced. Models should have to be trained on data that was obtained contractually.
