General Comment

From what I've seen, AI simply makes inferior product compared to what humans can do. It makes terrible art, and makes terrible decisions after being trained off of the hard work of real humans.

I have not seen or heard anybody in real life wishing for this much AI to be implemented in every occupation that it is being developed for, as it takes away jobs from real humans. There is simply no place for it in our lives. These companies that are trying so hard to force AI into our lives should make something more productive that benefits hard-working people more than AI that steals from people.
