

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-xfms-vlm5
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4395

Comment on FR Doc # 2025-02305

Submitter Information

Name: Paige Martz

Email: [REDACTED]

General Comment

AI needs more restrictions, not less, in order to prevent potential harm that can and will come from it continuing unchecked. Continuing to let AI run rampant would not only bring forth many consequences for people in creative fields, but will also give AI more ability to learn off of real people- making it all the more easy to create things like "deep-fakes" and other content that could incriminate real life people, including people of interest. Copyright law also exists for a reason and loosening the consequences for AI infringing on copyrights will also set a precedent that non-AI entities should be able to do the same as well.
