General Comment

The concept of looking into private sectors such as tribal organizations, and into infiltrating our educational system will have a severe and negative cultural impact on these groups. By removing what is considered "unnecessary" by using AI in these sectors will remove the capability and freedom of expression that these groups hold dear. As of right now AI has been used to invade the arts, and culture as a whole, thus cutting down time on freedoms of expression but making them appear to the common person unnecessary where we can focus more on a life working. But having seen the impact the arts can have on society, we get motivation, better sense of self, and understanding of the people around us. By removing the tools of creativity and expression, you are actively punishing those who use the Arts to formulate their thoughts, or help people find their true expression. If we look at it from a different angle, more people hold dear a piece of handcrafted furniture, that has love and time put into it, the love and history, it tells a story. A good piece of furniture was carefully crafted by someone who worked hard on their passion and holds to scrutiny, and Everyone I know has a piece of furniture in their house that holds an emotional impact to them. I have several heavy Walnut end tables and cabinets that were hand crafted here in the United states that symbolizes my parents marriage. I also have a pile of broken mass produced desks in my garage I use as a place to store garbage, that I don't care if they break and toss away. We remove this bit of American History by focusing on AI to cut out our cultural measures, we Lose the hard working American that this Bill is reportedly trying to save. It does a disservice to the craftsman, and the real American Pursuing happiness and freedom by telling his story and the story of America itself, but turning all this into a lines of Code on a computer. Our great national symbol the American Flag was hand crafted. Our national Anthem written, by a man hiding from battlements exploding above him, in a time of great distress, the purity of this nation has come out as a Symbol of who we are, but we lose these Stories by pushing AI, they will become things of Legend, and not our History, because we will be disassociated from these concepts We need people to create and build our culture and not generate it because someone hates looking inwardly at themselves because they don't embody the true definition of what this country stands for.

DO NOT LET THIS GO THRU!
