General Comment

Uncredited AI training is theft! If data is to be used for AI training, it should be compensated fairly! Just because something can be automated does not mean that it should. Before prioritizing the financial wellbeing of billionaires, millionaires, and conglomerates, we have a duty to prioritize the well-being of our individuals, and investing in AI will only divest more people from their jobs, rather than protect those people in the margins from getting lost in the cracks of society. Everyone has the right to live in comfort. Nobody should have the right to be a billionaire, and investing in AI is going to progress all the things in today's world that are antithetical to actual human flourishing.
