Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4446

Comment on FR Doc # 2025-02305

Submitter Information

Name: Karin Muether

Email: [REDACTED]

General Comment

AI "dominance" is not something the US should even want. The widespread use of AI in every facet of our lives is wreaking ecological havoc and destroying many jobs in creative and service fields. It's also unspeakably annoying.

As an artist, I have never and would never give my consent for my work to be used as part of a machine learning process. And yet, it has happened because my intellectual property rights were not taken seriously. I condemn any similar course of action going forward in the strongest possible language. If AI cannot flourish if it needs permission for and to pay for the materials that comprise the dataset, then it's a waste of everyone's time and is theft besides.

I acknowledge the wide application of the term "AI" and that some non artistic and considerably smaller and more precise applications for similar technology exist. I do not have anything against AI assisted cancer screenings, for example. If we are to go forward in the field, that is where emphasis should be.

But as for the artistic applications: paws off my copyright.
