General Comment

I do not believe AI holds any place in the future of the US. It is an economic sink whole that is spending more than making. It has no real use and just gives empty promises. AI also steals from my livelihood as an American and profits off of theft. It steals my art, my words, and my ideas. This type of theft destroys any reason the US has a patent office.
Overall AI and LLM like what OpenAI uses, has zero really world use case. It has spent trillions in capital but what trillion dollar problem has it solved? None!
