General Comment

I am an author, screenwriter, copyeditor and artist and I do not believe OpenAI or any type of generative AI/LLM systems have a place in the future of the US. All of my industries have been decimated by job cuts caused by CEOs and hiring managers buying into false hype about what AI is capable of, sending real human beings into financial crisis. The human and economic costs of buying in to the hype are too great for the American economy to remain robust and allowing this technology to get a foothold anywhere, especially in government, will be disastrous.
