General Comment

As an artist I don't believe companies should be able to carte blanche steal what people make to feed into a plagiarism machine to make nightmare horror images and writing. People own their work and it shouldn't be copied by machines that can't understand what it's replicating on a pixel by pixel or word by word basis. Generative AI is not the future, it will not help us, it will not save us and has already proven damaging to people's cognitive abilities.

I don't want to engage in what Gen ai makes. I want to read and see what people make. Creative work should not be replaced by machines.
