Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4482
Comment on FR Doc # 2025-02305

Submitter Information

Name: John Doe

General Comment

Generative AI is unprecedented technology. It is not a vector that produces consistent outputs. It is not a person with its own creative will. Not yet, at least. Generative AI is somewhere between.

Generative AI needs to be regulated, scrutinized, and leashed. It is fine to operate in infancy unrestrained, as professionals analyze its purpose and consequence, but that time has passed.

Generative AI has blatantly shown to derive content in ways that fundamentally differ from Human inspiration. AI generated content has swamped American social media with uncanny art that threatens to steal attention and profits from actual American content producers. Chatbots frequently report erroneous information, and the mass-production of AI-generated media facilitates misinformation campaigns.

Restrictions need to happen, and soon.
