

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-xkqf-zrxu
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4487
Comment on FR Doc # 2025-02305

Submitter Information

Name: Robert Garcia

[REDACTED]

General Comment

As a freelance filmmaker and an appreciator of film history, I can tell you that Artificial Intelligence will be a horrible investment, not only for the American people, but in general. Over the course of the history of film, there have been many technological advancements that have promised cheaper and better ways of filming, and while some have stayed, there have been some inventions that have been forgotten to time. A great example was motion capture, which was promised to be the future of animation, only for it to fall out of obscurity and now only used in high budget video games. This pattern fits with the current state of artificial intelligence, both writing and visual. If any more resources go into AI, it will be for naught, and it will only deepen the economic hole that the country is in right now.
