

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8a-xle2-jxhg
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4496
Comment on FR Doc # 2025-02305

Submitter Information

Name: Anonymous Anonymous
Email: [REDACTED]

General Comment

Generative AI should not be allowed to train on any art images, literature, or data without the explicit consent of the content creator.

Tools like these (OpenAI) only serve to steal from and further impoverish Americans -especially small business creatives, like freelance writers posting samples for work, or illustrators who need to upload work in order to secure art commissions- when measures aren't taken to ensure people can opt out of having their work be part of the trainable data.

Just because art, music, and video can be found on the internet does not make it free to take and fair game for commercial use. Especially so for a commercial Generative AI company that will not pay the millions of creatives who provide the content the tool trains on while pocketing money. Mechanisms should be in place for opting out BEFORE any training begins.

Or even better: pay the people making the content you want to train these tools on before training begins. Creatives are hard working Americans, too, and deserve payment.

Gen AI innovation doesn't have to and should not rely on theft.
