General Comment

AI has been proven to be a media of plagiarism, theft, and misinformation. People trust it less, as they should, as it hurts every aspect of society. Stolen art may not be as cared about as it should; but every person in this country and beyond are only going to be harmed by the reckless advancement of the power of current AI. The economic repercussions of this; let alone the effect that will be felt on preservation of the truth, are so immense that any person who values the present and the future should not allow it to pass.
