Document: NSF_FRDOC_0001-DRAFT-4521

Comment on FR Doc # 2025-02305

Submitter Information

Name: A C

General Comment

Open AI has been proven countless times to be stealing copyrighted material to train it's program. It would not only be allowing theft of products but theft of creative works. Companies like Open AI have also shown huge net lose over the years with countless investors keeping these projects afloat each time. Usually showing sinking stocks lose and countless rug pulls as well.

It would not just be detrimental to the government. But the government would end up a giant investment scheme into a flimsy program that has shown little progress in the past 2 years alone.
