General Comment

I believe AI has no place in the United States government or any industry. All it does is deprive the American workers of their livelihoods and seeks to spread misinformation and propaganda by people who do not hold the interests of the American people at heart. It is, to put it bluntly, a scam. A ponzi scheme designed to line the pockets of wealthy investors and not enrich the public. Additionally, it is not a good tool to help national security. It will actually increase the possibility of fraud and stolen identity cases, resulting in nefarious individuals to utilize sensitive information to break down our already shaky social structure. AI has no purpose other than to hasten the downfall of this country.
