General Comment

Giving a pardon of copyright to AI, like OpenAI, is going to break a lot of things!

Economically, it's non profitable and, in fact, burns money and resources just to work. Even for personal training use, it will be high maintenance with only an idea that could be changed later. Creatively, it will allow so many people's copyright, big companies included, to be stolen and stripped of meaning. People are proud and grateful that they get to share their work and the use of it in AI is going to make sure they aren't heard or paid when their art is being used by someone else.

It is far too harmful to all our futures and shouldn't be given an excuse to steal!
