General Comment

Generative AI is theft. It steals from working writers and artists to produce products of no value at all steep environmental cost. The purpose of AI is to put people out of work. The government should regulate it into oblivion, not remove barriers that protect American jobs. Generative AI is a bubble, a fantasy dreamed up by illiterate scroungers who do not value skill, expertise, or the economic strength that comes from people being paid for their work. Say yes to artists; no to billionaires.
