General Comment

This is a reversal of the very heart of copyright law. Absolutely not. No private company deserves to skirt copyright just because they have a trendy technology that can't make a profit. I refuse to let this blunder into our culture.

This will set back American ingenuity by decades and cost us billions if not more. Coders, artists, writers, journalists, anyone who could ever be concerned about copyright, about proprietary information, about American culture and economy, should halt this immediately.
