Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4566

Comment on FR Doc # 2025-02305

Submitter Information

Email: [REDACTED]

Organization: GameWeaver Games

General Comment

OpenAI and Google are both undermining the free people of the United States of America by desiring for the Federal Government to abolish laws that protect intellectual property designed and developed by individuals and companies as creative commons or open license ideas or property despite there being no written consent for this by the owner of the IP. Essentially, we are reverting to a time when the people who founded this country did not desire to have their ideas, thoughts, or property stolen, destroyed, or legally censored by a government that did not believe in free thought or ownership outside of the state. If Open AI or any other GenAI company or organization were able to take a company or individual's IP for any reason other than consent, contractual licensing, or legal action then they would be outright stealing property, which is a criminal offense according to the constitution. Please, for freedom of individuals & companies and to uphold the constitution's protection of intellectual property from the state, other companies, or individuals refrain from allowing GenAI organizations from abolishing or working around the federal copyright law.
