General Comment

The use of AI "trained" on, in many cases, copyrighted human creation, is the ultimate theft of intellectual property and destruction of human innovation ever seen. AI can create or boil down information but it doesn't understand justice is contact, and is being used for decisions that have real world impacts. On top of this, the operation of artificial intelligence requires vast resources that cannot reasonably be sustained without harm. We should not be encouraging the use of AI nor funding it's development.
