General Comment

Artificial Intelligence on a grand scale will only do more harm than good for this planet. We will speed up global warming and make the world a worse place for our children and those who already live here. It will be nothing but a hassle as no one can work, and we will all be out of house and home due to corporate GREED and nothing more. Do not let this in, Do no let AI take over our planet and drain our only home we have in this galaxy.
