Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-4637

Comment on FR Doc # 2025-02305

Submitter Information

Name: Ian Dixon

Email: [REDACTED]

General Comment

It is absolutely imperative that OpenAI and other companies who wish to scrape copywritten materials be held accountable under the law for stealing creations they did not properly license with the consent and permission of the original creator. They also try to claim their business model cannot succeed without theft. If they need to steal data to be successful, then they are based on a criminal act and should not be allowed to thrive. Additionally, the theft of this data goes beyond just taking something as it can then recreate and mimic the original creator itself. It presents a block for any new and original content as people are afraid of their likeness and voice being stolen and used against their will. Generative AI models destroy the environment and so far have no true groundbreaking use case to justify their outrageous valuations. Without proper plans in place to protect people, these companies will ruin countless lives with their AI slop.
