General Comment

Under no circumstances should any apparatus, AI or otherwise, be allowed to circumvent the rights of creators to use their content without permission or compensation. AI represents an attempt by tech companies to legalize theft under the guise of national security and tech development and is woefully under regulated. The government should be drafting legislation to protect creator's copyright from AI, not carving out exceptions for it. If AI companies want to use the content from creators, they should have to acquire permission via a license with due monetary compensation.
