General Comment

It is imperative that copyright be preserved. Companies like OpenAI claim to need uniquely broad access to copyrighted works to develop their products, but they're just after the right to take with impunity from American citizens, and use other's commercial works without having to compensate the owners in any way. The Chinese AI sector has seen enormous advancement in the past year without any such uniquely permissive access to copyrighted work. OpenAI and similar companies are simply lazy and looking for handouts, lagging behind foreign AI sectors even when given more resources.

Do not give the AI sector special carveouts or exceptions to established copyright law.
