General Comment

Generative AI is destroying my livelihood after having first stolen from my illustrations without my consent. My illustrations and intellectual property should never have been used in any step of the AI generation process without my compensation. I have worked my whole life to be skilled enough to make my living and AI is taking that from me. I do not believe AI has the future in this country that these corporations are claiming it will, all in the name of their own profit. AI should not receive copyright carve outs that aide in destroying the lives of of/real people/ by being allowed to freely use their creations and contributions to society.
