General Comment

The idea around providing protections to groups like OpenAI is based in the idea that America's future lies with the further development of generative AI and LLMs. The problem is that there is no such future there. The systems these groups tout as the next step in creative output can only subsist through theft and general disregard for the work of artists, writers, voice actors, and more who work to provide not only for themselves but for those they share their work with.

In this context, artificial intelligence has only been used as a tool to further agendas that go past being anti-American to be outright anti-human. Fake videos of innocent people spouting ideas they don't believe in, iconic imageries repurposed for propaganda, jobs left by the wayside in favor of an inferior product. No one stands to benefit from this in the short or long term, we only have more people to hurt by providing protections to AI companies.

Do right by the people you're supposed to stand for, stop this plan from going through.

- Nicholas Grant
