General Comment

AI should not be immune from any lawsuit and SHOULD NOT be able to use copyrighted, or personal artwork, creations that are not properly compensated.

I do not believe AI holds a place in the future of the US above a research and scientific processes

AI steals from my livelihood as an American and profits off of theft

AI is overhyped and is fleecing the eyes of the American public.

AI should be used as for research purposes, learning the cosmos, training for cancer research and treatment, those things.

AI will only bankrupt American Citizens and corporations building false information.
