General Comment

As a voter, the idea that corporations should be given the ability to harvest data for the purpose of constructing AI models without consent and with no legal recourse is frankly disturbing.

AI has potential, but these works are not transformative, and have already been shown to be able to steal the content of human artists. No corporation should be able to take the copyrighted material of another citizen or corporation for the purposes of profiting from it through the training of an AI database without consent or compensation to the artist.
